Languages: English, Arabic

WORK EXPERIENCE

Automation Engineer Intern | Auto One Motors LLC

Summer 2026

- Built and deployed workflow automations for internal business operations and tracking systems, reducing repetitive manual data entry and creating more consistent follow-up processes.
- Mapped business workflows with staff, translated requirements into technical solutions, and validated changes before production use.
- Maintained internal tools after launch, troubleshoot issues, and improved visibility into workflow status and next actions for the team.

Software Developer & Automation Specialist | Marketplace Wholesale LLC

Aug 2024 – Aug 2026

- Built and maintained a full-stack order and inventory workflow tool that reduced manual processing errors and improved inventory visibility across day-to-day operations.
- Developed internal web applications, CMS-driven sites, and automation solutions supporting front-end, back-end, and business-process needs.
- Handled deployments, troubleshooting, Git-based development, and Ubuntu/server administration while supporting live business systems.

Full-Stack Development | Salam Foundation Inc.

Jan 2025 – May 2026

- Developed and deployed the organization's production website and CMS, allowing non-technical staff to manage admissions, events, announcements, and content.
- Automated administrative workflows, maintained production functionality, and resolved issues affecting routine staff processes.
- Gathered requirements from staff, validated changes before deployment, and supported handoff and ongoing use of technical tools.

PROJECTS

Full-Stack E-Commerce Platform — Rawh Wa Rayhan

2026

- Built and deployed a full-stack fragrance storefront with product listings, cart state management, checkout flow, and CMS-based product/content updates.
- Designed the site so non-technical users could manage products, pricing, and content without editing source code.

Business & Organization Websites — 4 Live Deployments

2024 – 2026

- Built and launched production websites for a private school, restaurant brand, and local business organizations, with responsive layouts and CMS-based content management.
- Managed deployment, production updates, troubleshooting, and ongoing client-facing technical changes.

Minecraft Server Plugin Suite + Ubuntu Server Administration

2024

- Created multiple custom Minecraft server plugins in Java, including automated/integrated command systems, a custom skills plugin, and other gameplay features built with object-oriented and event-driven design.
- Set up, ran, and managed multiple live multiplayer servers on Ubuntu Linux — handling SSH access, Java runtime configuration, cron-based automation, and port/network management.
