WORK EXPERIENCE

Automation Engineer & Marketing Specialist | Auto One Motors LLC May 2026 – August 2026

- Built and deployed workflow automations for internal operations, reducing manual data entry and improving follow-up processes.
- Supported dealership marketing and content efforts alongside internal automation work to boost business visibility.
- Worked with staff across departments to map workflows, translating requirements into clear technical solutions.
- Maintained internal tools after launch, troubleshooting issues and keeping the team aligned on next steps.

Operations Manager/Software Developer | Marketplace Wholesale LLC Aug 2024 – Aug 2026

- Managed day-to-day sourcing, inventory, and order fulfillment for the business's online resale channel.
- Built and maintained a full-stack order and inventory tool that reduced errors and improved visibility.
- Developed internal web applications, CMS-driven sites, and automation solutions across front-end and back-end needs.
- Handled deployments, troubleshooting, Git-based development, and Ubuntu/server administration for live business systems.

Full Stack Developer | Salam Foundation Inc. Jan 2025 – May 2026

- Developed and deployed the organization's website and CMS, letting non-technical staff manage admissions, events, and content.
- Automated administrative workflows and communicated changes clearly to staff, resolving issues in routine processes.
- Gathered requirements from staff, validated changes before deployment, and supported the team through handoff and ongoing use.

PROJECTS

Full-Stack E-Commerce Platform — Rawh Wa Rayhan 2026

- Built and deployed a full-stack fragrance storefront with product listings, cart management, and checkout flow.
- Designed the site so non-technical users could manage products, pricing, and content without editing source code.

Business & Organization Websites — 4 Live Deployments 2024 – 2026

- Built and launched production websites for a private school, restaurant brand, and local businesses, with responsive, CMS-based designs.
- Managed deployment, production updates, troubleshooting, and ongoing client-facing technical changes.

Minecraft Server Plugin Suite + Ubuntu Server Administration 2024

- Created multiple custom Minecraft server plugins in Java, including automated command systems and a custom skills plugin.
- Set up and managed multiple live multiplayer servers on Ubuntu Linux, handling SSH access and cron-based automation.

EDUCATION

The University of Texas at Dallas, Richardson, TX Expected Dec 2026

Bachelor of Science, Computer Science

- Coursework: Database Systems, Operating Systems, Algorithms, Automata Theory, Computer Graphics
